According to our (Global Info Research) latest study, the global Automatic Identification and Data Capture market size was valued at USD 32850 million in 2023 and is forecast to a readjusted size of USD 55390 million by 2030 with a CAGR of 7.8% during review period.

Automatic Identification and Data Capture (AIDC) involves capturing data automatically using equipment, such as barcode readers, or technologies, including RFID and speech recognition. Automatic Identification and Data Capture involves the use of magnetic stripe readers, optical character recognition, barcode scanners, RFID, and speech recognition to capture data automatically. It is a method used for recognizing objects, gathering information about them, and feeding it to computer systems without any human involvement. AIDC has several advantages, including inventory management, reduction in data entry errors, and consumption of less time.

Among all regions, APAC held the largest share of the automatic identification and data capture market in 2017. The leading position of APAC can be attributed to the rapid expansion of retail and logistics companies supported by the presence of several automatic identification and data capture players in the region.
