Abstracts

According to our (Global Info Research) latest study, the global Automatic Silver Sintering Die Attach Machine market size was valued at US\$ 149 million in 2025 and is forecast to a readjusted size of US\$ 241 million by 2032 with a CAGR of 6.6% during review period.

In 2025, global Automatic Silver Sintering Die Attach Machine production reached approximately 387 units?with an average global market price of around US\$ 375,000 per unit, and a gross profit margin of approximately 20%-40%. Automatic Silver Sintering Die Attach Machine is a highly specialized piece of semiconductor packaging equipment designed to automatically attach semiconductor dies (chips) to substrates or lead frames using silver sintering technology?a process that replaces traditional soldering with silver paste or foil to form a strong, thermally and electrically conductive bond.

The Automatic Silver Sintering Die Attach Machine market is developing rapidly, supported by the fast expansion of power semiconductors and the shift toward higher-reliability packaging technologies. Silver sintering is increasingly favored in advanced power device packaging because it offers superior thermal conductivity, high-temperature capability, and strong long-term reliability compared with conventional soldering in demanding applications. Demand is especially strong in SiC and GaN modules, EV power electronics, charging systems, renewable energy converters, and industrial drives. Product development is moving toward higher throughput, more precise pressure and temperature control, advanced vision alignment, data traceability, and tighter integration with smart factory systems. At the same time, customers are paying more attention to process repeatability, equipment uptime, and total cost of

ownership. However, the market still faces pressure from high capital investment, process complexity, silver material cost, and qualification requirements in automotive and industrial sectors. Overall, the segment is expected to maintain strong growth as advanced power packaging continues to upgrade.
