Automatic steel strapping machine is a machine specially used to automatically strap steel straps to objects or packaging materials. It is widely used in industrial production, especially in situations where high-strength strapping is required, such as strapping heavy, large packaging boxes or steel materials.

The automatic steel strapping machine can automatically complete a series of actions such as feeding, winding, tightening, cutting and locking the steel strap through the built-in control system and mechanical structure, without or with only a small amount of human intervention. This equipment not only improves the strapping efficiency, but also ensures the firmness and consistency of the strapping, reduces labor costs, and reduces errors and damage caused by improper manual operation.
