According to our (Global Info Research) latest study, the global Automatic Windows market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Automatic Window is used predominately for the purpose of natural ventilation and smoke ventilation and opening hard to reach windows.

The extraction of smoke and heat build up in any building can often be a difficult task to overcome. However, the inclusion of window automation systems can provide a simple ventilation system that meets with Building Regulations. By fitting a window with a mechanical actuator linked to a smoke and heat detecting system, the window will open and close automatically when smoke or excess heat are detected, returning the building to tenable conditions for its occupants.
