## **Abstracts**

Research analysis on the global automation market in textile industry identifies that the availability of favorable government policies will be one of the major factors that will have a positive impact on the growth of the market. Countries like India are key revenue generators for the global textile industry. Owing to favorable government policies, there are several investments and developments in this industrial sector, which will have a positive impact on the automation market. These policies are beneficial for the growth of the industry and drive the automation of processes, in turn, increasing the demand for field, control, and communication devices. India is already allowing 100% FDI in the textile industry under the automatic route. Industries listed under the automatic route need no approval from the Reserve Bank of India or the Government of India for any investments. Such favorable policies will attract investments in this sector and create a demand for automation products and services in the textile industry.
