Abstracts

Industrial monitors are widely used in a variety of industrial applications such as smart factories, mining operations, marine ports, food and beverage, oil rigs, and energy management. The ruggedness of industrial display differentiates these monitors from residential and commercial monitors. Industrial monitors are usually made of rugged materials to withstand the impact of harsh environments in both indoor and outdoor applications.

Scope of the Report:

This report focuses on the Automation Industrial Monitors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. According to the report, the rising complexity of industrial process has led to the evolution of SCADA and Distributed Control System (DCS)-based systems for factory automation in the past few years. SCADA and DC-based systems are widely employed in a variety of industries such as oil and gas, mining, power, and automotive to remotely control the physical processes and therefore, require display monitors to survey and control the process parameters continuously. Hence, the industrial monitors market is expected to increase along with the deployment of SCADA during the forecast period. Further, the report states that the demand for any industrial products is highly dependent on the macroeconomic business cycle. For example, during 2014-2015, the decline in crude oil prices by 50% created a contraction in investments in the oil and gas and allied industries, resulting in less demand for industrial monitors. In addition, due to the economic slowdown, many manufacturers faced disruption in payments, thereby, affecting the overall industry's ecosystem and its operations.

There are 15 Chapters to deeply display the global Automation Industrial Monitors market.
Chapter 1, to describe Automation Industrial Monitors Introduction, product scope, market overview, market opportunities, market risk, market driving force;
Chapter 2, to analyze the top manufacturers of Automation Industrial Monitors, with sales, revenue, and price of Automation Industrial Monitors, in 2016 and 2017;
Chapter 3, to display the competitive situation among the top manufacturers, with sales, revenue and market share in 2016 and 2017;
Chapter 4, to show the global market by regions, with sales, revenue and market share of Automation Industrial Monitors, for each region, from 2013 to 2018;
Chapter 5, 6, 7, 8 and 9, to analyze the market by countries, by type, by application and by manufacturers, with sales, revenue and market share by key countries in these regions;
Chapter 10 and 11, to show the market by type and application, with sales market share and growth rate by type, application, from 2013 to 2018;
Chapter 12, Automation Industrial Monitors market forecast, by regions, type and
