## **Abstracts**

Governments across the world are focusing on minimizing the emission of greenhouse gases and reducing the impact of global warming by incorporating several regulatory measures and protocols. These aggressive policies are contributing to the increased adoption of renewable sources for power generation. Technavio's market research analysts have identified the focus of governments towards implement new policies to support the growth of green energy as one of the primary factors that will trigger the growth of the automation solutions market in renewable power generation industry in the coming years. For instance, in the Americas, the US Environmental Protection Agency has come up with guidelines that clearly state that power plants older than 25 years with capacities over 50 MW require upgradation. With the increasing investment in the renewable sector, the adoption of automation solutions will subsequently increase in the power industry, fueling the market's growth prospects.
