Abstracts

In the short term, midstream companies are minimally impacted due to low energy prices and a decline in the price of oil. Since contracts in the oil and gas industry are fee-based, most contracts are finalized at fixed rates and contain minimum volume commitments or guarantees of minimum ROI. The augmented implementation of automation solutions, such as SCADA and DCS, to overcome issues like the unstable flow of fluids in pipelines and risers in the midstream infrastructure will lead to the growth of this market over the next four years.

Scope of the Report:

This report focuses on the Automation Solutions in Oil and Gas in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Another trend influencing this market's growth is the availability of automation solutions on the cloud. In the oil and gas sector, automation solutions are likely to be the next logical step in the evolution of automation technology. By shifting towards cloud-based environments, oil and gas companies can significantly reduce costs, achieve greater flexibility, and enhance functionality. A cloud-based platform shifts the task of maintaining data from the oil and gas service companies to the cloud service provider and eliminates the expenses incurred and problems related to the hardware layer of IT infrastructure for companies.

The worldwide market for Automation Solutions in Oil and Gas is expected to grow at a CAGR of roughly 1.0% over the next five years, will reach xx million US\$ in 2023, from 76900 million US\$ in 2017, according to a new GIR (Global Info Research) study.
