According to our (Global Info Research) latest study, the global Automobile Carburetor market size was valued at USD 1323.2 million in 2023 and is forecast to a readjusted size of USD 1049.7 million by 2030 with a CAGR of -3.3% during review period.

Automobile Carburetor is the device inside an internal combustion engine that provides the area for air and gasoline to mix them together so that the engine runs properly. If there is not enough fuel mixed with the air, the engine 'runs lean' and either will not run or potentially damages the engine. If there is too much fuel mixed with the air, the engine 'runs rich' and either will not run (it floods), runs very smoky, runs poorly (bogs down, stalls easily), or at the very least wastes fuel.

Global Automobile Carburetor key players include Keihin Group, Zama, Ruixing, Mikuni, etc. Global top four manufacturers hold a share over 20%.

China is the largest market, with a share over 35%, followed by Asia (Ex.China), and North America, both have a share over 35 percent.
