The global Automobile Tire market size is expected to reach \$ 227490 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

Automotive Tire is a ring-shaped component that surrounds a wheel's rim to transfer a vehicle's load from the axle through the wheel to the ground and to provide traction on the surface traveled over. Most tires are pneumatically inflated structures, which also provide a flexible cushion that absorbs shock as the tires rolls over rough features on the surface. Tires provide a footprint that is designed to match the weight of the vehicle with the bearing strength of the surface that it rolls over by providing a bearing pressure that will not deform the surface excessively.

Global Auto Tire main manufacturers include GoodYear, Bridgestone and Continental, totally accounting for 43% of the market. Europe is the largest market, with a share over 30%. As for the types of products, it can be divided into OE Tire and Replacement Tire. The most common type is Replacement Tire, with a share over 70%. In terms of application, it is widely used in Passenger Vehicle and Commercial Vehicle, accounting for 75% and 25% respectively.
