## Abstracts

The increase in number of road accidents as one of the primary factors that will trigger the growth of the automotive active body panel market in the coming years. With the advent of new technologies, products, and solutions, the automotive industry is rapidly evolving. Road accidents are the primary reason for the growing development of advanced safety technologies and solutions. It has been observed that millions of people die on the road every year due to on-road collisions across the world. Rising traffic deaths and fatality rates have compelled the government to issue strict automotive safety norms. The basic safety systems have been enhanced by integrating frontal airbags, anti-lock braking system (ABS), or electronic brakeforce distribution (EBD).

### Scope of the Report:

This report focuses on the Automotive Active Body Panel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The development of energy-storing body panels is one of the key trends in the automotive active body panel market.
