Abstracts

To reduce emission levels, increase fuel efficiency, and improve driving dynamics of the vehicle, the automobile industry is focusing on advanced technologies. Aluminum alloys find its application in automobiles as they are lighter than the steel vehicles and has the capacity to absorb twice the impact of energy during accidents. Technavio's market research report has identified utilization of lightweight vehicles and alternative materials for chassis manufacturing as one of the primary factors that will fuel the growth of the automotive active engine mount market in the coming years. The demand for fuel-efficient vehicles are increasing and with the growing fuel economy of vehicles, there will be significant reduction in the consumers expense on fuels. Owing to the increasing demand for higher fuel-efficiency with reduced vehicle weight, will drive the growth of the automotive engine and engine mounts market.
