Abstracts

To reduce emission levels, increase fuel efficiency, and improve driving dynamics of the vehicle, the automobile industry is focusing on advanced technologies. Aluminum alloys find its application in automobiles as they are lighter than the steel vehicles and has the capacity to absorb twice the impact of energy during accidents. Technavio's market research report has identified utilization of lightweight vehicles and alternative materials for chassis manufacturing as one of the primary factors that will fuel the growth of the automotive active engine mount market in the coming years. The demand for fuel-efficient vehicles are increasing and with the growing fuel economy of vehicles, there will be significant reduction in the consumers expense on fuels. Owing to the increasing demand for higher fuel-efficiency with reduced vehicle weight, will drive the growth of the automotive engine and engine mounts market.

Scope of the Report:

This report focuses on the Automotive Active Engine Mount in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Utilization of magnetorheological elastomers in engine mounts is one of the key trends contributing towards the automotive active engine mount market. Magnetorheological (MR) elastomers are smart materials which have the capability to be used in active engine mounts. The MR elastomers lacks fluid parts and hence they are regarded as more reliable and easier for mass production. The magnetic particles of the elastomers are suspended and aligned when a magnetic field is applied, and it helps in curing the elastomers

The automotive active engine mount market is fragmented due the presence of several

players. The key players have clear dominance due to their wide geographic presence across the world with production facilities. These vendors compete in the automotive engine and engine mounts market on price, quality, and innovations. The worldwide market for Automotive Active Engine Mount is expected to grow at a CAGR of roughly 10.0% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
