The active rear spoiler is used for attaining maximum control with minimal drag. The system automatically extends the wings as per speed limit for creating maximum downforce. The active rear spoiler is widely used in hypercars and is gaining traction in the supercar segment. The use of active rear spoiler allows sports cars to achieve high speed and control during cornering. Additionally, this system gives an aesthetic appeal to the car.

Scope of the Report:

This report focuses on the Automotive Active Rear Spoiler in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The rising popularity of carbon fiber active rear spoilers is one of the latest trends that will contribute to the growth of this market in the forthcoming years. Carbon fiber is finding its way into new applications in various industries as a replacement to metal due to its advantages such as higher strength-to-weight ratio, corrosion resistance, and workability. The automotive industry has witnessed the adoption of carbon fibers for applications where weight reduction plays a significant role. The use of carbon fiber is driven by emission control regulations, which demand less fuel consumption by vehicles. The cost parameter limits the carbon fiber usage to luxury cars and supercars and these vehicles are increasingly adopting carbon fiber to improve their performance. The automotive active rear spoiler market is limited to the supercar segment. However, the market is expected to witness significant adoption during the forecast period due to the requirement of differentiated and high-performance products by customers. The introduction of new players or automotive OEMs installing active aerodynamics in their

variants will have a positive influence on the market's growth.

The worldwide market for Automotive Active Rear Spoiler is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
