Abstracts

The active suspension system in an automotive is responsible for continuously adjusting the suspension settings as per the road conditions to provide a smooth and comfortable driving experience. The leading automakers around the world are offering advanced suspension technologies in their premium and luxury models to offer a rich driving experience to its customers. Automobile suspension systems emerged at the beginning of 19th century when automobiles were invented. Internal combustion engine powered vehicles were still in their embryo stage, and only two innovations were made to form the vehicle's suspension system. Initially, front coil springs were used, along with dampeners, to act as shock absorbers for minimizing vibrations in vehicles. Later, leaf springs were used, which were flexible to accommodate varying weights and less expensive.

Scope of the Report:

This report focuses on the Automotive Active Suspension System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Electronic components in automobiles have outgrown the utility of traditional mechanical components. Preference for electronic components is increasing due to the increased need for safety, performance, stability, and comfort in vehicles. Technavio's market research report has identified shift towards electrification of automotive components as one of the primary factors that will fuel the growth of the automotive active suspension system market in the coming years. To develop the trend of electrification, manufacturers are adopting new technologies. The automotive industry is witnessing

extensive use of the sensors, actuators, accumulators, ECUs, hydraulic pumps, and on-board computers for the operation of various systems. Moreover, vehicle electrification has led semi-active and active suspension systems to adopt electronic and electro-hydraulic components.

The worldwide market for Automotive Active Suspension System is expected to grow at a CAGR of roughly 9.1% over the next five years, will reach 220 million US\$ in 2023, from 140 million US\$ in 2017, according to a new GIR (Global Info Research) study.
