Abstracts

Adaptive front lighting system (AFLS) is a dynamic safety feature tailored to make driving easier and safer at night and in low-light conditions by increasing visibility. The AFLS augments the distribution of light according to driving circumstances.

Scope of the Report:

This report focuses on the Automotive Adaptive Front Lighting System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The introduction of AFLS in the automotive lighting market is gaining popularity among end-users as it provides enhanced visibility to the driver at night. The intensity and angle of headlights beams are adjusted depending on the direction or speed of the vehicle by increasing the nighttime visibility, reducing the high beam dazzle, and improving the visibility while turning. Manufacturers have integrated AFLS with the LED technology because it helps in the conservation of energy. Research analysis on the global automotive adaptive front lighting system market identifies that the integration of AFLS with LED technology will be one of the major factors that will have a positive impact on the growth of the market. The AFLS with the LED technology and LED headlights provide improved visibility as it has precise lighting pattern and is more reliable.

The adoption of the automotive AFLS is increasing due to the growing number of road accidents at night resulting in severe injuries and fatalities. European legislation is trying to reduce fatalities by encouraging the inclusion of an increased number of safety systems in vehicles. As a result, automotive suppliers are offering automotive AFLS,

which enhances the visibility of the driver. The growing number of fatalities leading to the adoption of automotive AFLS is identified as one of the key trends that will gain traction in the automotive adaptive front lighting system market during the estimated period.

The worldwide market for Automotive Adaptive Front Lighting System is expected to grow at a CAGR of roughly 13.3% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
