Abstracts

According to our (Global Info Research) latest study, the global Automotive ADAS Camera Module Adhesive market size was valued at US\$ 225 million in 2025 and is forecast to a readjusted size of US\$ 493 million by 2032 with a CAGR of 11.5% during review period.

In 2025, global Automotive ADAS Camera Module Adhesive production reached approximately 1,700 tons, with an average global market price of around 128.5 USD/kg.

Automotive ADAS camera module adhesive is a high-performance, automotive-grade bonding and sealing material tailored for advanced driver assistance system camera modules, engineered to bond critical components including lens assemblies, image sensors, circuit boards and housing enclosures, while providing environmental protection against vibration, temperature fluctuations, dust and moisture; it meets strict automotive industry standards for thermal stability, optical compatibility, mechanical durability and long-term reliability to ensure the consistent and accurate operation of ADAS camera systems in diverse driving conditions.

Global demand for automotive ADAS camera module adhesives is experiencing robust growth, driven by the mandatory adoption and high penetration of ADAS systems in passenger and commercial vehicles, the industry's shift toward higher levels of autonomous driving, and stringent automotive safety and reliability standards; as automakers and tier-1 suppliers prioritize high-performance, custom-formulated adhesives with optical clarity, extreme environmental resistance and fast-curing properties, significant business opportunities emerge for adhesive manufacturers in OEM supply chain partnerships, custom formulation development for advanced camera

modules, and the production of low-VOC, environmentally compliant automotive-grade adhesives, with additional growth potential in the aftermarket for ADAS module repair and replacement, as well as cross-border supply to emerging automotive markets accelerating their ADAS adoption curves.
