A spark plug is an important component of a vehicle that is screwed into the engine cylinder. It generates a spark that ignites the compressed air-fuel mixture, which ensures the continuous movement of the piston. There has been an increased demand for fuel-efficient and low-emission vehicles because of the stringent emission norms adopted across all economies and the growing awareness about environmental issues among consumers. This has led to the continuous evolution of spark plugs.

Scope of the Report:

This report focuses on the Automotive Aftermarket for Spark Plugs in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Owing to the continuous rise in the number of new registrations and longer life of the cars, the number of vehicles in use is steadily increasing. Also, the OEMs are extending their warranties on their vehicles to simultaneously increase the car reliability.

Technavio's market study identifies the increase in the parc vehicles to be one of the primary growth factors for the automotive aftermarket for spark plugs. Also, the extension of maintenance of the cars through various service packages has resulted the consumers to easily maintain their cars.

Modern GDI engines operate at higher pressure and temperature, consequently, requirement for ignition voltage also increases. Spark plugs manufacturers are offering high-performance spark plugs to withstand high pressure and temperature. High-performance spark plugs ensure reliable ignition of the fuel-air mixture. To fulfill the growing demands, manufacturers are focusing on enhancing the specifications of the

spark plugs. According to our analysts, the development of better designed spark plugs for GDI engines is one of the key factors that will gain traction in the automotive aftermarket for spark plugs in the coming years.
