An airbag inflator receives a signal in the event of a vehicle collision and a chemical reaction generates nitrogen gas, which inflates the airbag.

Scope of the Report:

This report focuses on the Automotive Airbag Inflators in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. One of the primary drivers for this market is the rise in automotive sales in emerging economies across the globe. Emerging markets have witnessed a steady growth in automobile sales due to strong economic growth, ideal demographics, and increased purchasing power of people. The economic growth in BRICS (Brazil, Russia, India, China, and South Africa) nations has propelled the growth in the automotive industry in the past few years. This has compelled several global automakers to partner with the domestic automakers of these emerging markets to enter this untapped market space. For instance, Ford teamed with Changan Auto, while BMW sells its cars in China through Brilliance China Automotive. Moreover, strong economic growth and the increased purchasing power create a strong market for luxury and premium vehicles, which will propel the market for automotive airbag inflators during the forecast period. One of the latest trends gaining traction in this market is the introduction of flexible vent technology. The flexible vent technology ensures that the inflation of airbags is no more dependent on the sensors. A smart air pressure control mechanism regulates inflation by controlling the airflow through the vent. The conventional airbags used to get inflated by the release of energy through the inflator. The body size of the airbags is generally of the dual stage to accommodate with the severity of the accident. Inputs are taken from

the electronic control unit (ECU) and a sensor that gives the position and weight of the driver, and the final inflation limit is controlled depending on the severity of the crash. This enhanced technological advancement in the technology will augment growth in the global automotive airbag inflators market in the coming years.

The worldwide market for Automotive Airbag Inflators is expected to grow at a CAGR of roughly 8.3% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
