The global Automotive Aluminum Alloy Sheet market size is expected to reach \$ 77776 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Automotive Aluminum Alloy Sheet refers to rolled aluminum alloy flat products specifically designed for use in automotive body, structural, and functional components. These sheets offer a combination of lightweight, high strength, good formability, corrosion resistance, and recyclability, helping vehicle manufacturers reduce weight, improve fuel efficiency, and meet emissions regulations. Automotive aluminum sheets are widely used in body panels, closures, structural reinforcements, battery enclosures, and heat management parts, especially in electric and lightweight vehicles. In 2025, global Automotive Aluminum Alloy Sheet in Automotive production reached approximately 11140 k tons, with an average global market price of around US\$5100 usd per ton. The production capacity for Automotive Aluminum Alloy Sheet in 2025 was approximately 12000 k tons. The typical gross profit margin for Automotive Aluminum Alloy Sheet is between 20% and 40%.

The Automotive Aluminum Alloy Sheet market is driven by the automotive industry's shift toward lightweighting, energy efficiency, and carbon emission reduction, as automakers increasingly replace traditional steel with aluminum sheets in body-in-white, closures, and structural components. Aluminum alloy sheets offer a high strength-to-weight ratio, excellent corrosion resistance, and good formability, making them well suited for applications such as hoods, doors, roofs, battery enclosures, and body panels in both internal combustion engine vehicles and electric vehicles. Market growth is supported by stricter fuel economy and emission regulations, rapid EV adoption, and advancements in forming and joining technologies, with North America, Europe, and

Asia-Pacific as the key production and consumption regions.

This report studies the global Automotive Aluminum Alloy Sheet production, demand, key manufacturers, and key regions.
