Abstracts

Automobile aluminum paste coating is a special coating used for automobile surface coating. It usually contains aluminum powder or aluminum foil flakes, which gives the paint a shiny metallic appearance. This kind of paint can be used for the whole vehicle spraying or partial painting, such as for the decoration or detail painting of the car body, to increase the appearance appeal and gloss of the car. Aluminum paste coatings generally have good weather and corrosion resistance, as well as some wear resistance, making them one of the popular choices for automotive exterior decoration.
