Abstracts

The global automotive ABS market is growing owing its adoption in a wide range of applications, including passenger cars, CVs, and motorcycles. Motorcycle ABS in emerging countries such as India is expected to gain traction due to the development of low-cost ABS and safety regulations will increase the acceptance of these systems in passenger cars. Favorable regulations mandating ABS in all motorcycles with a displacement of above 125cc along with passenger cars and CVs will drive the market growth considerably.

According to our (Global Info Research) latest study, the global Automotive Anti-Lock Braking System market size was valued at USD 45140 million in 2022 and is forecast to a readjusted size of USD 68390 million by 2029 with a CAGR of 6.1% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The emergence of connected truck technologies will drive the adoption of ABS in commercial vehicles (CVs), which, in turn, will drive the growth prospects for the global automotive ABS market for the next four years. Some of the major factors responsible for the growing acceptance of ABS in the commercial vehicles segment is the increasing focus of fleet operators on fleet safety and the potential reduction in financial losses. Also, the growing number of road accidents have resulted in the introduction and adoption of a large number of technological advancements in the commercial vehicles sector as commonly witnessed in the passenger car segment. Moreover, some of the technological advancements included in the commercial vehicles segment are connected truck technologies, improved version of higher Society of Automotive Engineers (SAE) automation levels, and truck platooning.
