The global automotive ABS market is growing owing its adoption in a wide range of applications, including passenger cars, CVs, and motorcycles. Motorcycle ABS in emerging countries such as India is expected to gain traction due to the development of low-cost ABS and safety regulations will increase the acceptance of these systems in passenger cars. Favorable regulations mandating ABS in all motorcycles with a displacement of above 125cc along with passenger cars and CVs will drive the market growth considerably.

Scope of the Report:

This report focuses on the Automotive Anti-Lock Braking System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The emergence of connected truck technologies will drive the adoption of ABS in commercial vehicles (CVs), which, in turn, will drive the growth prospects for the global automotive ABS market for the next four years. Some of the major factors responsible for the growing acceptance of ABS in the commercial vehicles segment is the increasing focus of fleet operators on fleet safety and the potential reduction in financial losses. Also, the growing number of road accidents have resulted in the introduction and adoption of a large number of technological advancements in the commercial vehicles sector as commonly witnessed in the passenger car segment. Moreover, some of the technological advancements included in the commercial vehicles segment are connected truck technologies, improved version of higher Society of Automotive Engineers (SAE) automation levels, and truck platooning.

The worldwide market for Automotive Anti-Lock Braking System is expected to grow at a CAGR of roughly 9.0% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
