The global Automotive Automatic Transmission market size is expected to reach \$ 91250 million by 2032, rising at a market growth of 1.6% CAGR during the forecast period (2026-2032).

Automotive Automatic Transmission is a device that is connected to the back of the engine and sends the power from the engine to the drive wheels. An automobile engine runs at its best at a certain RPM (Revolutions per Minute) range and it is the transmission's job to make sure that the power is delivered to the wheels while keeping the engine within that range. It does this through various gear combinations.

Global Automotive Automatic Transmission key players include AISIN, Jatco, Hyundai, ZF, Honda, etc. Global top five manufacturers hold a share nearly 50%.

North America is the largest market, with a share about 30%, followed by Europe, and Japan, both have a share over 35 percent.

In terms of product, AT is the largest segment, with a share over 50%. And in terms of application, the largest application is Passenger Car, followed by Commercial Vehicles.
