Automotive battery aftermarket refers to a secondary market available for automotive batteries after sales in the original market. Lithium-ion, lead acid, nickel-based, and sodium-ion are some types of automotive batteries. Moreover, light commercial vehicle (LCV), medium & heavy commercial vehicle (M&HCV) and passenger cars are the vehicles types which are target segment of automotive battery aftermarket.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
