Abstracts

The global Automotive Body Stampings market size is expected to reach \$ 417010 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032).

Stamping (also known as pressing) is the process of placing flat sheet metal in either blank or coil form into a stamping press where a tool and die surface forms the metal into a net shape. Stamping includes a variety of sheet-metal forming manufacturing processes, such as punching using a machine press or stamping press, blanking, embossing, bending, flanging, and coining. This could be a single stage operation where every stroke of the press produces the desired form on the sheet metal part, or could occur through a series of stages. The process is usually carried out on sheet metal, but can also be used on other materials, such as polystyrene.

The stamping process plays a major role in determining the efficiency of automotive body part production.

Global Automotive Body Stampings key players include VW, Toyota, General Motors, Ford Motor, etc. Global top four manufacturers hold a share over 35%.

China is the largest market, with a share about 30%, followed by Europe, and USA, both have a share about 35 percent.

In terms of product, Carbon Steel is the largest segment, with a share over 90%. And in terms of application, the largest application is Passenger Vehicle, followed by Commercial Vehicle.
