## Abstracts

According to our (Global Info Research) latest study, the global Automotive Brake Corner Module market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A brake corner module (BCM) is a compact, integrated system that combines the braking, suspension, and wheel-end functions of a vehicle into a single unit. It typically includes the brake caliper or drum, brake pads or shoes, rotor or drum, wheel hub, bearing, and suspension components such as the control arm and ball joint. By integrating these components into a single module, the BCM simplifies the assembly process, reduces the number of parts needed, and improves the overall performance and reliability of the braking system. BCMs are commonly used in modern automotive designs and are particularly useful in electric and hybrid vehicles where space is at a premium.
