According to our (Global Info Research) latest study, the global Automotive Central Gateway Module market size was valued at USD 1385.8 million in 2023 and is forecast to a readjusted size of USD 1667.6 million by 2030 with a CAGR of 2.7% during review period.

A gateway is a central router that securely and reliably interconnects and transmits data across multiple different networks within a vehicle. It interacts information between functional domains (powertrain, chassis and safety, body control, infotainment, telematics, ADAS) that share data through physical isolation and protocol transformation. Vehicles increasingly rely on electronic control units (ECUs) to enhance the driving experience. As a communication bridge between various ECU networks, gateway controller through the external interface (including high and low speed CAN, LIN, Ethernet protocol) to achieve data exchange, play a fundamental role.

At present, the market is relatively concentrated. Major global manufacturers include Robert Bosch, Continental, Denso and Lear Corporation, etc. The top five manufacturers account for more than 85.2%.
