Abstracts

According to our (Global Info Research) latest study, the global Automotive Coatings Adhesives and Sealants market size was valued at USD 5539.3 million in 2023 and is forecast to a readjusted size of USD 8136.5 million by 2030 with a CAGR of 5.6% during review period.

Automotive Coatings adhesives and sealants are so versatile that they have been extensively applied in various forms in the automotive industry. Still, there are new applications that are being developed as cars and truck makers are demanding the production of better and higher performance products that can bond dissimilar materials so that they will function as one single unit.

Sealants are widely used because of their capacity to fill gaps and voids, to be insoluble, to resist corrosion and to be flexible in avoiding relative movement of substrates. Compared to adhesives, they have lower strength, but they are more flexible. The demand for insulation, lamination, impenetrable flooring, coating, durable facades and other end-user requirements have induced increased production of high quality sealants and adhesives.
