## Abstracts

According to our (Global Info Research) latest study, the global Automotive Components EMC Testing market size was valued at US\$ 1561 million in 2025 and is forecast to a readjusted size of US\$ 2914 million by 2032 with a CAGR of 9.4% during review period.

Automotive Components EMC Testing is the process of evaluating the performance of automotive components in an electromagnetic environment. Its purpose is to ensure that these parts do not generate or suffer electromagnetic interference under normal operation and fault conditions, and to ensure the stability and safety of automotive electronic systems. This type of testing includes radiated emission, immunity, conducted emission and immunity to comply with relevant standards and regulations to ensure that the electromagnetic compatibility of the vehicle meets the expected requirements.

Influenced by factors such as climate change and the rapid advancement of technology, the automotive industry is moving toward four major trends: connected, shared, autonomous, and electric vehicles. These trends are helping to drive the overall growth of automotive electronic components, such as advanced driver-assist systems (ADAS), infotainment systems and vehicle connectivity devices

The increasing integration of electronic systems in vehicles and their interaction with portable devices have made the development and validation of automotive products increasingly complex. In order to meet regulatory and industry standards for electromagnetic compatibility (EMC), speed up the validation process and reduce development costs, manufacturers need to evaluate and ensure the reliability, safety and electromagnetic compatibility of electrical and electronic components from the

design and concept stage.

The global key companies of Automotive Components EMC Testing include SGS, Bureau Veritas, TUV SUD, Dekra, Intertek Group, UL Solutions, Applus+ Laboratories, Element, and Horiba, etc. In 2024, the global top five players had a share approximately 32% in terms of revenue.
