Automotive Digital Dashboard is an instrument panel that uses digital electronic technology as the basis and uses precision electronic components such as high-definition LCD or OLED to display vehicle information. Compared with traditional vehicle dashboards, digital dashboards have the advantages of richer information, clearer brightness, and better interactivity. The digital instrument panel can be customized to display information, such as speed, speed, fuel level, water temperature, mileage, navigation, entertainment system and other information. The digital instrument panel of some models can also perform voice recognition and gesture recognition operations, realizing a more intelligent interaction method. Digital instrument panel is one of the development trends of automobile instrument panel, and has gradually become the standard equipment in high-end models.
