According to our (Global Info Research) latest study, the global Automotive Door and Window Sealing Strips market size was valued at US\$ 4949 million in 2025 and is forecast to a readjusted size of US\$ 6695 million by 2032 with a CAGR of 4.4% during review period.

In 2025, global sales of automotive door and window sealing strips reached 1.85 billion meters, with an average selling price of US\$2.6. Automotive door and window sealing strips are functional rubber products installed on vehicle doors, windows, and body frames. They primarily function to seal and waterproof, insulate and reduce noise, prevent dust and vibration, and improve overall vehicle comfort and safety, making them a crucial component of a vehicle's NVH performance. Upstream raw materials mainly include EPDM rubber, TPE elastomer, carbon black, additives, and metal or plastic skeletons. On average, each meter of sealing strip consumes approximately 0.18 kg of rubber material, with EPDM and TPE accounting for about 60% of the material cost. Midstream production is completed by specialized rubber product companies through mixing, extrusion, vulcanization, and surface treatment. Downstream supply mainly consists of OEMs and Tier 1 automotive parts suppliers, with passenger vehicles accounting for approximately 75% and commercial vehicles 25%. Global total production capacity is approximately 2.2 billion meters, with an average industry gross profit margin of approximately 20%-30%. Looking at the composition of downstream consumption, new car parts account for about 80%, and after-sales replacement accounts for 20%. On the demand side, it is driven by automobile production and sales, model upgrades and the increasing penetration rate of new energy vehicles. The future development path is concentrated in the direction of lightweighting, low VOC, recyclable materials and high sealing integration. The increasing requirements for sealing

performance of new energy vehicles and high-end models will continue to bring stable demand and structural business opportunities.
