According to our (Global Info Research) latest study, the global Automotive Dry Film Lubricants market size was valued at US\$ 16.6 million in 2024 and is forecast to a readjusted size of USD 23.1 million by 2031 with a CAGR of 4.9% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Dry Film Lubricants reduce friction between two sliding surfaces while functioning at high operating pressure and temperature without the need for oils and greases. These lubricants offer long-lasting lubrication, protection from corrosion, and resistance to wear & tear. Dry film lubricants can operate at temperatures of up to 350 °C in oxidizing environments and up to 1100 °C in non-oxidizing environments. These lubricants are made from materials such as Polytetrafluoroethylene (PTFE), boron nitride, graphite, molybdenum disulfide (MoS₂), and tungsten disulfide. Molybdenum disulfide (MoS₂) is commonly used to make dry film lubricants.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major

automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
