According to our (Global Info Research) latest study, the global Automotive Electronics Control Unit (ECU) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The rise in automotive production coupled with increasing safety standards across the globe is anticipated to propel the automotive ECU market growth over the forecast timeline. Various government institutions supporting the expansion of vehicle production and sales are providing an impetus to the industry demand. For instance, the Government of India has adopted its Automotive Mission Plan (AMP), 2016-2026 to improve and enhance the parts and vehicle manufacturing imbalance. The plan is developed in conjunction with the Make in India initiative that focuses on the development of the manufacturing sector in the region.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
