Abstracts

Automotive electronics are electronic systems used in road vehicles, such as: engine management, ignition, radio, computers, telematics, in-car entertainment systems and others.

Scope of the Report:

This report focuses on the Automotive Electronics in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia Pacific is expected to continue accounting for the majority of the global market over the next six years. The government in China has promoted C-NCAP's safety assessments encouraging buyers to see a five-star rating as a guide to vehicle's quality. The U.S. Department of Transportation has mandated safety equipment such as a backup camera in all new vehicles, increasing vehicle costs by USD 200 for the new base models. The DOT also maintains Federal Motor Vehicle Safety Standards and Regulations (FMVSS), which prescribe crash-avoidance components hence reducing environmental pollution and gas consumption. Growing demand for more interactive systems such as embedded vision systems capable of real-time image tracking has gained prominence. There has been an increase in adoption of green technologies owing to stringent government regulations leading to decrease in modular platforms.

The worldwide market for Automotive Electronics is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
