According to our (Global Info Research) latest study, the global Automotive Exhaust Manifold Gasket market size was valued at USD 542.9 million in 2023 and is forecast to a readjusted size of USD 674.9 million by 2030 with a CAGR of 3.2% during review period.

Automotive Exhaust Manifold Gasket is the component in the automotive engine, between the surface of the cylinder head and the exhaust manifold. The exhaust manifold takes the burned exhaust gases from the engine's cylinders and ejects the gas through the exhaust system and out through the car's tail pipe. An exhaust manifold gasket seals the connection between the manifold and cylinder head. This prevents exhaust leakage out of the connection and also ensures that all exhaust gas will flow through the catalytic converter for treatment.
