## Abstracts

The global Automotive Extruded Aluminum Alloy market size is expected to reach \$ 77776 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Automotive Extruded Aluminum Alloy refers to aluminum alloy materials that are shaped into long, continuous profiles through an extrusion process and specifically engineered for automotive applications. These alloys offer a combination of high strength-to-weight ratio, excellent corrosion resistance, good energy absorption, and design flexibility, making them widely used in vehicle body structures, chassis components, battery enclosures, crash management systems, and thermal management parts. Automotive extruded aluminum alloys play a critical role in vehicle lightweighting, improving fuel efficiency and extending driving range, especially in electric vehicles (EVs). In 2025, global Automotive Extruded Aluminum Alloy production reached approximately 11140 k tons, with an average global market price of around US\$5100 usd per ton. The production capacity for Automotive Extruded Aluminum Alloy in 2025 was approximately 12000 k tons. The typical gross profit margin for Automotive Extruded Aluminum Alloy is between 20% and 40%.

The Automotive Extruded Aluminum Alloy market is driven by vehicle lightweighting requirements, fuel efficiency regulations, and the rapid growth of electric vehicles, as automakers increasingly replace steel components with high-strength aluminum extrusions. Extruded aluminum alloys are widely used in body-in-white structures, battery enclosures, crash management systems, and chassis components due to their high strength-to-weight ratio, excellent corrosion resistance, and design flexibility. Market growth is supported by rising EV production, the adoption of modular vehicle architectures, and advancements in alloy development and extrusion technologies, with

Asia-Pacific, Europe, and North America as the key regions.

This report studies the global Automotive Extruded Aluminum Alloy production, demand, key manufacturers, and key regions.
