According to our (Global Info Research) latest study, the global Automotive Front-end Module market size was valued at USD 8224.4 million in 2023 and is forecast to a readjusted size of USD 34970 million by 2030 with a CAGR of 23.0% during review period.

Automotive Front End Module is consists of building the automotive front end off line, and installing the entire module as one complete assembly on the vehicle rather than building up the front end vehicle component by component. The Front End Module is the aggregate of components located in its front part which carry out many functions (esthetical, structural, aerodynamically, engine cooling, and safety) and which are preassembled as subassembly ready to be installed into the vehicle. The Front End Module included many components, such as Radiator, Condenser, Core Support, Headlight, Front Grill, Bumpers, Fenders, Crash Management System, and Others.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the

world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
