According to our (Global Info Research) latest study, the global Automotive Grade Film Capacitors market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Automotive-grade film capacitors have the advantages of high voltage resistance, high current, and low stray inductance, and are usually used in the DC support circuit of the inverter. Film capacitors can quickly replenish energy for high-speed switching devices with their excellent fast charging and discharging performance, and absorb transient overvoltages in the DC support circuit, thereby protecting high-speed switching devices such as IGBTs or SiC MOSFETs.
