## Abstracts

According to our (Global Info Research) latest study, the global Automotive Adaptive Suspension System market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The adaptive suspension system is finding its way in the newer models due to flexibility and ease of use. They are getting so advanced that even the least sensitive drive can use it without any difficulty. The driver can distinguish between comfort and sports mode, with mere clicks on the screen. Automotive industry is one of the most lucrative industries due to continuous evolution of technology transformation, every day. The change in technology in the automotive industry has made adaptive suspension system more advanced, unlike the passive suspension system that changes the movement by the surface of the road.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
