## Abstracts

According to our (Global Info Research) latest study, the global Automotive Micro Mezzanine Connector market size was valued at US\$ 856 million in 2025 and is forecast to a readjusted size of US\$ 1314 million by 2032 with a CAGR of 6.3% during review period.

Automotive Micro Mezzanine Connector is a compact board-level interconnection solution designed for vertically layered automotive electronic modules, enabling high-density power and signal transmission between closely spaced circuit boards while meeting stringent requirements for vibration resistance, thermal cycling endurance, and long-term reliability. Its advantages include a reduced form factor, high interconnect density, stable electrical performance, and strong compatibility with automated assembly, supporting the transition toward centralized and modular vehicle electronic architectures. In 2025, production was approximately 141 million units, and the average price was USD 5.9 per unit. The industry capacity utilization rate in 2025 was about 60%, and the average gross margin was around 39%. Upstream, copper and engineering plastics are the most critical raw materials, with representative suppliers including Aurubis, Wieland, BASF, DuPont, Kingfa Sci & Tech, and Sinopec, providing conductive metals and high-performance polymer materials. The midstream segment focuses on micro mezzanine connector architecture design, contact and terminal engineering, precision molding, fine plating and surface treatment, automated assembly, and automotive-grade electrical, mechanical, and environmental reliability validation, which together determine contact reliability, signal integrity, and long-term stability. Downstream, Automotive Micro Mezzanine Connector is mainly applied in passenger vehicles and commercial vehicles, with representative customers including Toyota, Volkswagen, BMW, Mercedes-Benz, Ford, General Motors, Volvo Group,

Daimler Truck, BYD, SAIC Motor, and FAW Group, driven by vehicle electrification, intelligent systems, and increasing electronic integration.
