## Abstracts

The global Automotive Paint & Coating market size is expected to reach \$ 26260 million by 2032, rising at a market growth of 2.4% CAGR during the forecast period (2026-2032).

Automotive coatings, like most Other, are used mainly to provide protection and decoration. Water-based acrylic polyurethane enamel paint is currently the most widely used paint for reasons including reducing paint's environmental impact. Modern automobile paint is applied in several layers, with a total thickness of around 100  $\mu\text{m}$ (0.1mm). Paint application requires preparation and primer steps to ensure proper application. A basecoat is applied after the primer paint is applied. Following this, a clearcoat of paint may be applied that forms a glossy and transparent coating. The clearcoat layer must be able to withstand UV light.

The key players are PPG Industries, BASF and Axalta Coating Systems, etc. Top 3 companies occupied about 55% market share. Asia-Pacific is the largest market, with a share about 45%, followed by Europe and North America with the share about 25% and 17%. In terms of product, water-based coating is the largest segment, with a share over 60%. And in terms of application, the largest application is OEM, followed by refinish.
