## Abstracts

According to our (Global Info Research) latest study, the global Automotive Plastic Injection Mould market size was valued at US\$ 19010 million in 2025 and is forecast to a readjusted size of US\$ 29290 million by 2032 with a CAGR of 6.4% during review period.

The automotive injection mould is for producing automobile plastic products. This mould must have a complete structure and accurate size. It is a very practical mold type. The heated and melted materials are fed into the mold cavity through a certain high pressure, and then the molded parts of the automobile injection mold are obtained after a certain cooling treatment.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
