Abstracts

Automotive plastics possess many desirable characteristics including durability, strength, recyclability, and scratch and abrasion resistance that allow design, modeling, and incorporation of components made of these materials in automobiles. In modern vehicles, plastics constitute almost half of the total volume of the vehicle yet contribute to hardly 10% of the total weight making them lighter and improving fuel efficiency.

Scope of the Report:

This report focuses on the Automotive Plastics for Passenger Vehicles in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
