Automotive rear window wiper is a type of windshield wiper that is located on the rear windshield of a vehicle. This wiper is designed to keep the rear windshield clear of rain, snow, and other debris that can limit a driver's vision. The rear window wiper is typically smaller than the front windshield wipers and is controlled by a switch inside the vehicle. Many newer cars also feature a rear window wiper with a washer nozzle, which sprays a mixture of water and cleaning solution onto the rear windshield before the wiper blade passes over it to remove any debris. The rear window wiper is an important safety feature that helps drivers maintain clear visibility while driving in inclement weather, which helps to reduce accidents on the road.
