Abstracts

Automotive refinish are a functional coating formulated to be used on damaged surfaces of automotive exteriors in order to restore them, realizing the same feeling of color as that of new vehicles.

Scope of the Report:

This report focuses on the Automotive Refinish in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The global automotive refinish market size was USD 2.2 billion in 2016 and increasing automotive refinish demand in light of rising road collisions and aftermarket modifications will fuel market growth. Growing consumption of refinish coatings in automotive maintenance, repair, and aftermarket painting on account of excellent visual appearance, surface protection, resistance to corrosion, extreme weather, temperature, heat and water is expected to promote industry expansion.

Solvent borne technology accounted for 51% of the global Revenue share in 2016 and is expected to witness slow growth owing to stringent regulations on VOC emission levels. However, improvements in technologies and innovations have led to the development of high solid formulations. High solid formulations are widely used owing to high-quality finish and reduced emissions, which in turn will augment solvent borne coatings industry size over the forecast period.

The industry is extremely competitive in nature with the key players involved in R&D and continuous product innovation. PPG Industries, Sherwin-Williams (Valspar), Axalta

Coating Systems, Akzo Nobel, BASF were the major players and accounted for over 85% of the overall market share in 2016.

The worldwide market for Automotive Refinish is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
