The automotive RF connector is a high-frequency signal transmission connector designed for automotive applications. It is mainly used in the fields of vehicle antennas, navigation systems, wireless communications, radars and entertainment systems. It can reliably transmit RF signals in complex automotive environments, and has the characteristics of high-frequency performance, strong anti-interference ability and high durability. Common types include Fakra and HSD connectors to meet the needs of different vehicle systems for high-speed data and RF signal transmission. Among them, Fakra is mainly used in radios and RF Bluetooth; Mini-Fakra will replace some of the Fakra needs in the future, mainly used in camera systems, 3D dashboards, navigation systems, on-board computers and other fields; HSD connectors are mainly used in digital infotainment equipment. At present, the market is mainly occupied by three companies: Rosenberg, TE Electronics, and Amphenol, while Chinese companies are rising rapidly with the development of electric vehicles.
