Abstracts

Silicone are one of the fastest growing products around the world and their demand in the automotive sector is expected to grow rapidly due to rising investment by the manufacturers in novel products and technologies.

Scope of the Report:

This report focuses on the Automotive Silicone in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The demand in Europe is expected to witness a moderate growth with a CAGR of over 5.6% on account of slowdown in the automobile industry in this region. Germany has been spearheading the demand for automotive silicone in this region. The presence of a large number of automotive component manufacturers and its close proximity to Poland which is the biggest automobile market in Eastern Europe is likely to augment the demand in Germany.

The North American market is expected to grow at a slower pace due to sluggish passenger vehicle production in the region. The rise in imports from Asia Pacific and Europe is responsible for low growth rates in North America.

The worldwide market for Automotive Silicone is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
