According to our (Global Info Research) latest study, the global Automotive Slack Adjuster market size was valued at USD 739.8 million in 2023 and is forecast to a readjusted size of USD 844.8 million by 2030 with a CAGR of 1.9% during review period.

Automotive slack adjuster is a main component that keeps the brake shoes at the proper distance from the surface of the brake drums. As the brake shoes and the brake drums wear down, the automatic slack adjusters will automatically adjust the brake shoes so that the shoes remain at the proper distance from the drums. If the brake shoes lock up within the brake drums, the automatic slack adjusters must be manually adjusted to release the brakes.
