## Abstracts

According to our (Global Info Research) latest study, the global Automotive Start-Stop System market size was valued at US\$ 41.1 million in 2024 and is forecast to a readjusted size of USD 90.7 million by 2031 with a CAGR of 12.1% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The car start-stop system is a technology designed to reduce vehicle fuel consumption and emissions. The system automatically shuts down the engine when the car is stopped, such as when it is stopped at a traffic light or when the vehicle is stopped in a traffic jam. Once the driver releases the brake or presses the accelerator pedal, the system quickly restarts the engine so that the vehicle can continue to move. This technology saves fuel by reducing the engine idling time, especially in city driving conditions.
